

University of Glasgow
Course/Programme Approval Process
Student Consultation Proforma

Course/Programme Name: MSc in Chemistry
MSc in Chemistry with Medicinal Chemistry

Principal Department: Chemistry

Faculty: Physical Sciences

1. Please describe which students were consulted and when, i.e. class(es) and number consulted. If an entire class was consulted indicate which class was involved.

Staff/Student meeting 25th November 2009
25 Class representatives from all levels

2. How was the information presented to the students?

Verbal description of the course and its content. The MSci students on the SSC are already doing the components of the proposed MSc degree programmes.

3. Summary of student feedback.

Both the BSc and MSci students are in favour of the new degree programmes. The BSc honours students see this as an opportunity for them to upgrade to MSc and the MSci students think that having graduates attending the M lectures will enhance their learning experience. All students thought that this is a welcome development.

Head of Department's Signature

Date:29th January 2010.....

Guidelines

1. Consult more junior students who might take the proposed course or programme in future years (this will not apply to Level 1 courses).

And/or consult senior students who have already taken courses at the level of the proposed course. If there is no similar course on offer, consult with a group of students closest to the proposal.

2. Students should be asked specifically about:

- whether the course would be challenging
- whether the course would be stimulating
- whether the course would meet their expectations
- the proposed workload
- methods of teaching, learning and assessment
